Introduction

Index Objective

The S&P China Indices are designed to measure the performance of various segments of the Chinese equity market. The range of indices allows the Chinese equity market to be segmented by the various Chinese share classes as well as by size and GICS® sector.

All indices are either direct subsets of the S&P Global BMI + China A or use it as the underlying universe of eligible securities.

For information on the S&P Global BMI Methodology and related sub-indices, please refer to the S&P Global BMI, S&P/IFCI Methodology document available on our Web site, www.spdji.com.

Highlights and Index Family

S&P Access China A. The index is designed to measure the performance of China A-Shares available to foreign investors through the Northbound Trading Segments of the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect Programs. It is a composite of the S&P Shanghai-Hong Kong Connect Northbound and S&P Shenzhen-Hong Kong Connect Northbound indices.

S&P Shanghai-Hong Kong Connect Northbound. The index is designed to measure the performance of China A-Shares available to foreign investors through the Northbound Trading Segment of the Shanghai-Hong Kong Stock Connect Program.

S&P Shenzhen-Hong Kong Connect Northbound. The index is designed to measure the performance of China A-Shares available to foreign investors through the Northbound Trading Segment of the Shenzhen-Hong Kong Stock Connect Program.

S&P Access China A 50. The index is designed to measure the performance of the largest stocks within each GICS sector in the S&P China Access A and is float-adjusted market capitalization weighted with the aim of weighting each GICS sector as close as possible to the float GICS sector weight of the broader S&P Access China A.

S&P Access Hong Kong. The index is designed to measure the performance of Hong Kong-listed stocks available to Chinese mainland investors through the Southbound Trading Segments of the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect Programs.

S&P U.S.-Listed China 50. The index is designed to measure the performance of the largest U.S.-listed Chinese companies.

S&P China A BMI. The index is designed to measure the performance of all A-shares meeting the S&P Global BMI's inclusion criteria, after applying the lower of an aggregate foreign ownership limit (FOL)¹ of 30%, or the investable weight factor of each constituent.

S&P China A BMI Domestic. The index is designed to measure the performance of all A-shares meeting the S&P Global BMI's inclusion criteria. The investable weight factor (IWF) for stocks in the index reflect the percentage of shares available to Chinese mainland investors.

¹ Aggregate foreign ownership limits are determined by the China Securities Regulatory Commission (CSRC) and are subject to change.

S&P China BMI. The index is designed to measure the performance of the investable universe of Chinese stocks available to international investors (B, H, Red Chips, P Chips and Chinese securities listed in the U.S., Singapore or any other global exchange venue).

S&P Total China BMI. The index is a combination of the S&P China A BMI and S&P China BMI, and represents the integrated investment universe of Chinese companies (A, B, H, Red Chips, P Chips and Chinese securities listed in the U.S., Singapore or any other global exchange venue). The IWFs for A-share stocks is the lower of an FOL of 30%, or the investable weight factor of each constituent.

S&P Total China BMI Domestic. The index is a combination of the S&P China A BMI and S&P China BMI, and represents the integrated investment universe of Chinese companies (A, B, H, Red Chips, P Chips and Chinese securities listed in the U.S., Singapore or any other global exchange venue). The IWF for A-share stocks in the index reflect the percentage of shares available to Chinese mainland investors.

S&P Total China + Hong Kong BMI. The index is a combination of the S&P Total China BMI and S&P Hong Kong BMI and represents the integrated universe of securities from China and Hong Kong. The IWFs for A-share stocks is the lower of an FOL of 30%, or the investable weight factor of each constituent.

S&P Total China + Hong Kong BMI Domestic. The index is a combination of the S&P Total China BMI and S&P Hong Kong BMI and represents the integrated universe of securities from China and Hong Kong. The IWF for A-share stocks in the index reflect the percentage of shares available to Chinese mainland investors.

S&P Total Greater China BMI. The index is a combination of the S&P Total China BMI, S&P Hong Kong BMI and S&P Taiwan BMI and represents the integrated universe of securities from the Greater China region. The IWFs for A-share stocks is the lower of an FOL of 30%, or the investable weight factor of each constituent.

S&P Total Greater China BMI Domestic. The index is a combination of the S&P Total China Domestic BMI, S&P Hong Kong BMI and S&P Taiwan BMI and represents the integrated universe of securities from the Greater China region. The IWF for A-share stocks in the index reflect the percentage of shares available to Chinese mainland investors.

S&P Total China BMI Size Indices. Each regional BMI index has been sub-divided into size benchmarks. LargeCap, MidCap, SmallCap, LargeMidCap and MidSmallCap versions are available.

S&P Total China BMI Domestic Size Indices. Each regional BMI index has been sub-divided into size benchmarks. LargeCap, MidCap, SmallCap, LargeMidCap and MidSmallCap versions are available.

S&P Hong Kong-Listed China 30. The index is designed to measure the performance of the largest and most liquid Chinese stocks listed on the Hong Kong Stock Exchange that are freely available for all foreign investors.

S&P Hong Kong-Listed China MidSmallCap Select. The index is designed to measure the performance of the most liquid Hong Kong-listed Mid- and Small-Cap Chinese companies in the S&P China BMI.

S&P China 500. The index is designed to measure the performance of the 500 largest, most liquid Chinese companies while approximating the sector composition of the broader Chinese equity market. All Chinese share classes, including A-shares and offshore listings, are eligible for inclusion.

S&P New China Sectors. The index is designed to measure the performance of the constituents of the S&P Total China Domestic + Hong Kong BMI, excluding those that fail to meet specific country of incorporation, market capitalization, liquidity, and sector requirements.

S&P New China Sectors Ex A-Share. The index is designed to measure the performance of the constituents of the S&P Total China Domestic + Hong Kong BMI, excluding China A-shares and all companies that fail to meet specific country of incorporation, market capitalization, liquidity, and sector requirements.

S&P China A Venture Enterprises Index. The index is designed to measure the performance of all stocks listed on the ChiNext board of the Shenzhen Stock Exchange meeting the S&P Global BMI's inclusion criteria.

Supporting Documents

This methodology is meant to be read in conjunction with supporting documents providing greater detail with respect to the policies, procedures and calculations described herein. References throughout the methodology direct the reader to the relevant supporting document for further information on a specific topic. The list of the main supplemental documents for this methodology and the hyperlinks to those documents is as follows:

S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology	Equity Indices Policies & Practices
S&P Dow Jones Indices' Index Mathematics Methodology	Index Mathematics Methodology
S&P Dow Jones Indices' Float Adjustment Methodology	Float Adjustment Methodology
S&P Dow Jones Indices' Global Industry Classification Standard (GICS) Methodology	GICS Methodology

This methodology was created by S&P Dow Jones Indices to achieve the aforementioned objective of measuring the underlying interest of each index governed by this methodology document. Any changes to or deviations from this methodology are made in the sole judgment and discretion of S&P Dow Jones Indices so that the index continues to achieve its objective.

Eligibility Criteria and Index Construction

S&P Access China A

Index Construction. The index represents the universe of China A-Shares available to foreign investors through the Northbound Trading Segments of the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect Programs and is formed by combining the constituents of the S&P Shanghai-Hong Kong Connect Northbound and S&P Shenzhen-Hong Kong Connect Northbound Indices.

Weighting. The index is weighted by float-adjusted market capitalization.

S&P Shanghai-Hong Kong Connect Northbound

Index Universe. The index universe is defined as all stocks in the S&P China A Domestic BMI.

Constituent Selection. Those stocks in the index universe that satisfy the rules governing eligibility for the Shanghai-Hong Kong Stock Connect Program are selected and form the index.

Weighting. The index is weighted by float-adjusted market capitalization.

S&P Shenzhen-Hong Kong Connect Northbound

Index Universe. The index universe is defined as all stocks in the S&P China A Domestic BMI and S&P China A Venture Enterprises Index.

Constituent Selection. Those stocks in the index universe that satisfy the rules governing eligibility for the Shenzhen-Hong Kong Stock Connect Program are selected and form the index.

Weighting. The index is weighted by float-adjusted market capitalization.

S&P Access China A 50

Index Universe. The index universe is defined as all stocks in the S&P Access China A.

Constituent Selection. Constituent selection is as follows:

1. All constituents of the S&P Access China A are ranked by six-month Median Daily Value Traded (MDVT). Any company with six-month MDVT less than US\$ 2.5 million is ineligible. Current constituents remain eligible as long as their MDVT remains above US\$ 2 million.
2. All remaining stocks are then ranked by float-adjusted market capitalization in descending order within each GICS sector.
3. The largest stock from each of the 11 GICS sectors is selected.
4. The float-adjusted sector weights of the selected stocks from step 3 are compared with the float-adjusted sector weights of the S&P Access China A.
5. The next largest stock by float-adjusted market cap from the most underweighted sector is selected.
6. Steps 4 and 5 are repeated until 29 additional stocks are selected for a total of 40. These 40 stocks become index constituents.
7. Steps 4 and 5 are repeated to identify 20 additional stocks for index consideration. These 20 are flagged as either current index constituents or non-constituents.
8. Stocks from step 7 identified as existing constituents are selected for index inclusion until a total of 50 index constituents have been selected. In case the stocks from step 7 identified as existing constituents are exhausted before a total of 50 constituents have been selected, stocks in step 7 identified as non-constituents are then selected to achieve the target constituent count of 50 by repeating step 5.

Weighting. The index is weighted by float-adjusted market capitalization.

S&P Access Hong Kong

Index Universe. The index universe is defined as all companies in the S&P Global BMI and S&P China A Domestic BMI that are listed on the Hong Kong Exchange.

Constituent Selection. Those stocks in the index universe that satisfy the rules governing eligibility for the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect Programs are selected and form the index.

Weighting. The index is weighted by float-adjusted market capitalization.

S&P U.S.-Listed China 50

Index Universe. The index universe is defined as all stocks in the S&P China BMI that are listed on U.S. exchanges.

Constituent Selection. The largest 50 stocks by total market capitalization are selected for inclusion subject to buffer rules as follows:

1. Eligible stocks that are ranked within the top 45 by total market capitalization are selected for index inclusion.
2. Existing constituents that are ranked within the top 55 are selected for index inclusion until the constituent count reaches 50.
3. If after step 2, the constituent count is below 50, then eligible non-constituent stocks are added based on rank order until the target count of 50 is achieved.
4. If the number of stocks in the eligible universe is less than 50, as defined above, then only those stocks are included and the index will have less than 50 constituents.

Weighting. The index is weighted by float-adjusted market capitalization subject to a single stock cap of 10%. Index constituent weights are updated quarterly, after the close of trading on the third Friday of March, June, September and December.

S&P China A BMI

Index Universe. The index universe is defined as all listed A-Share stocks in China.

Constituent Selection. Those stocks in the index universe that satisfy the rules for inclusion in the S&P Global BMI are selected and form the index.

Weighting. The index is weighted by float-adjusted market capitalization. The IWFs for A-share stocks is the lower of an FOL of 30%, or the investable weight factor of each constituent.

S&P China A BMI Domestic

Index Universe. The index universe is defined as all listed A-Share stocks in China.

Constituent Selection. Those stocks in the index universe that satisfy the rules for inclusion in the S&P Global BMI are selected and form the index.

Weighting. The index is weighted by float-adjusted market capitalization using an IWF that reflects the percentage of shares available to mainland Chinese investors.

S&P China BMI

Index Universe. The index universe is defined as all Chinese stocks available to international investors (B, H, Red Chips, P Chips and Chinese securities listed in the U.S., Singapore or any other global exchange venue).

Constituent Selection. Those stocks in the index universe that satisfy the rules for inclusion in the S&P Global BMI are selected and form the index.

Weighting. The index is weighted by float-adjusted market capitalization.

S&P Total China BMI

Index Construction. The index represents the integrated investment universe of Chinese companies (A, B, H, Red Chip and P Chips and Chinese securities listed in the U.S., Singapore or any other global exchange venue) and is formed by combining the constituents of the S&P China A BMI and S&P China BMI.

Weighting. The index is weighted by float-adjusted market capitalization. The IWFs for A-share stocks is the lower of an FOL of 30%, or the investable weight factor of each constituent.

S&P Total China BMI Domestic

Index Construction. The index represents the integrated investment universe of Chinese companies (A, B, H, Red Chip and P Chips and Chinese securities listed in the U.S., Singapore or any other global exchange venue) and is formed by combining the constituents of the S&P China A Domestic BMI and S&P China BMI.

Weighting. The index is weighted by float-adjusted market capitalization. The A-share stocks use an IWF that reflects the percentage of shares available to mainland Chinese investors.

S&P Total China BMI and S&P Total China BMI Domestic Size Indices. The S&P Total China BMI and S&P Total China BMI Domestic are sub-divided into size benchmarks.

All S&P Total China BMI Size Indices are calculated based on the complete Chinese equity universe, including both A-shares and offshore listings. These size classifications are utilized in all indices that include the S&P Total China BMI (e.g. S&P Total Greater China BMI) and are also used to construct the S&P China A BMI. LargeCap, MidCap, SmallCap, LargeMidCap and MidSmallCap versions are available.

The splits are based on the cumulative market capitalization in the S&P Total China BMI Domestic. The companies are ranked by total market capitalization, which is considered to be a better reflection of the economic significance of the company in the economy; then float-adjusted market cap is accumulated to 70% for LargeCap, the next 15% for MidCap and the final 15% for SmallCap indices. Where a company has multiple share classes, the share classes are combined to measure the company's total market cap.

A three percentage point buffer is maintained between the three size ranges (Large, Mid and Small) to minimize turnover. If a stock moves in its ranking within the three percentage point range where a size-split occurs, then that stock does not change its classification. The evaluation is done during the annual reconstitution.

If any company exceeds the 85% top-down, cumulative float, SmallCap threshold or the 70% top-down, MidCap threshold in a country following a corporate event such as a merger or spin-off, the company migrates to the appropriate size classification on the ex-date. Reclassification of a company's size does not cause a reclassification of other companies in the same country or market.

IPO additions are sized according to their full market cap rank and cumulative float-adjusted market cap within the S&P Total China BMI and S&P Total China BMI Domestic as of the quarterly rebalancing reference date.

Please note that size flags for Chinese domiciled stocks in the S&P Global BMI may differ from the size flags used in the S&P Total China BMI and S&P Total China BMI Domestic.

S&P Total China + Hong Kong BMI

Index Construction. The index represents the integrated universe of securities from China and Hong Kong and is formed by combining the constituents of the S&P Total China BMI and S&P Hong Kong BMI.

Weighting. The index is weighted by float-adjusted market capitalization. The IWFs for A-share stocks is the lower of an FOL of 30%, or the investable weight factor of each constituent.

S&P Total China + Hong Kong BMI Domestic

Index Construction. The index represents the integrated universe of securities from China and Hong Kong and is formed by combining the constituents of the S&P Total China BMI Domestic and S&P Hong Kong BMI.

Weighting. The index is weighted by float-adjusted market capitalization. The A-share stocks use an IWF that reflects the percentage of shares available to mainland Chinese investors.

S&P Total Greater China BMI

Index Construction. The index represents the integrated universe of securities from the Greater China region and is formed by combining the constituents of the S&P Total China BMI, S&P Hong Kong BMI and S&P Taiwan BMI.

Weighting. The index is weighted by float-adjusted market capitalization. The IWFs for China A-share stocks is the lower of an FOL of 30%, or the investable weight factor of each constituent.

S&P Total Greater China BMI Domestic

Index Construction. The index represents the integrated universe of securities from the Greater China region and is formed by combining the constituents of the S&P Total China BMI Domestic, S&P Hong Kong BMI and S&P Taiwan BMI.

Weighting. The index is weighted by float-adjusted market capitalization. The A-share stocks use an IWF that reflects the percentage of shares available to mainland Chinese investors.

S&P Hong Kong-Listed China 30

Index Universe. The index universe is defined as all stocks in the S&P China BMI that are listed on the Hong Kong Exchange (i.e. H Shares, P Chips and Red Chips).

Eligible Securities. All common and preferred shares (which are of an equity and not of a fixed income nature) are eligible for inclusion. Convertible stock, bonds, warrants, rights, and preferred stock that provide a guaranteed fixed return are not eligible.

Liquidity. Only listed companies that are actively traded on the Hong Kong Stock Exchange are included in the S&P Hong Kong-Listed China 30. The key criteria for assessing liquidity are annual trading volume and annual turnover rate of float-adjusted shares versus market trading turnover.

Domicile. A stock's domicile is determined based on a number of criteria that include headquarters of the company, registration, listing of stock, place of operations, and residence of the senior officers. Only China domiciled stocks are eligible for index inclusion.

For a detailed description of Domiciles, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Constituent Selection. The index is composed of 30 of the largest, most liquid stocks listed on the Hong Kong Stock Exchange from companies domiciled in China. The stocks are selected as follows:

1. Eligible stocks are ranked by float-adjusted market capitalization. Those outside of the top 60 are excluded from index consideration. Current index constituents ranked within the top 60 are automatically reselected for index inclusion.
2. From the remaining stocks, non-constituents with sector weights below their respective index universe weights are selected in accordance with their rank in step 1 until the target count of 30 is achieved.
3. If any of the stocks in step 2 have the same or similar float-adjusted market capitalization (as determined by the Index Committee), the company with the higher liquidity is selected.

Weighting. The index is weighted by float-adjusted market capitalization.

S&P Hong Kong-Listed China MidSmallCap Select

Index Universe. The index universe is defined as all Mid- and Small-Cap stocks in the S&P China BMI that are listed and trade on the Hong Kong Exchange and that meet the following criteria as of the rebalancing reference date:

- Stocks must meet a relative Median Daily Value Traded (MDVT) inclusion threshold in order to be eligible for index inclusion. The inclusion threshold is determined by ranking the eligible universe of stocks by descending 12-month MDVT. Any stock with a 12-month MDVT value at or above the lowest 12-month MDVT value from the top 70% of the float-adjusted market capitalization of the eligible universe is eligible for index inclusion, with a 5% buffer applied for current index constituents.
- Trade price must be at least HKD 1 (If the trade price for existing constituents is less than HKD 1, the constituent remains in the index if its one-month average price as of the rebalancing reference date is at least HKD 1).

Constituent Selection. Stocks in the index universe that satisfy the criteria above are selected and form the index.

Weighting. The index is weighted by float-adjusted market capitalization subject to a single stock cap of 5%. Index constituent weights are updated quarterly, after the close of trading on the third Friday of March, June, September and December.

S&P China 500

Index Universe. The index universe is defined as all constituents of the S&P Total China BMI Domestic that meet the following criteria as of the rebalancing reference date:

- Float-adjusted market capitalization must be at least US\$ 300 million (US\$ 250 million for existing constituents).
- Six-month median daily value traded must be at least US\$ 1 million (US\$ 0.8 million for existing constituents).

Constituent Selection. Constituent selection is as follows:

1. Eligible stocks are ranked by total market capitalization within each GICS sector in descending order.
2. Select largest company based on total market capitalization within each sector, including all listings of the company.
3. Compare the sector breakdowns (by float-adjusted market capitalization) of the selected stocks to the index universe and find the most underweighted sector. Add the next largest company (by total capitalization) in that sector, including all eligible listings of the company.
4. Repeat Step 3 until the number of selected companies reaches 350. All selected companies and their eligible listings are included in the index.
5. Repeat Step 3 to select 300 additional companies (including all eligible listings) to form a buffer zone.
6. Add the existing constituent companies in the buffer zone to the index by repeating Step 3 until they are all exhausted or the total number of selected companies in the index reaches 500.
7. If after Step 6, the total number of selected companies is still less than 500, new candidate companies and all their eligible listings in the buffer zone are added by repeating Step 3 until the total number of selected companies in the index reaches 500.

Weighting. The index is weighted by float-adjusted market capitalization.

S&P China 500 Sector Indices. Sector indices based on the constituents of the S&P China 500 are available. S&P Dow Jones Indices assigns index constituents to each S&P China 500 Sector Index based on the constituent's classification under the Global Industry Classification Standard (GICS®).

For more information on GICS, please refer to S&P Dow Jones Indices' GICS methodology.

S&P New China Sectors Index

Index Universe. The index universe is defined as all constituents of the S&P Total China + Hong Kong BMI Domestic that are incorporated in China, Hong Kong, Singapore, and domiciles of convenience (see *Appendix II*), and meet the following criteria as of the rebalancing reference date:

- A float-adjusted market capitalization of at least US\$ 2.5 billion.²
- A three-month average daily value traded of at least US\$ 8 million.³
- An Investable Weight Factor (IWF) of at least 15%.
- A Global Industry Classification Standard (GICS®) classification as detailed below.

GICS Level	GICS Code	Description
Sector	25	Consumer Discretionary
Sector	30	Consumer Staples
Sector	35	Health Care
Sector	50	Telecommunication Services
Industry Group	2020	Commercial & Professional Services
Industry Group	4030	Insurance
Industry Group	4510	Software & Services
Industry	551050	Independent Power and Renewable Electricity Producers
Sub-Industry	20301010	Air Freight & Logistics
Sub-Industry	20302010	Airlines
Sub-Industry	20304010	Railroads
Sub-Industry	20305010	Airport Services
Sub-Industry	20305020	Highways & Railtracks
Sub-Industry	45201020	Communications Equipment

Constituent Selection. All stocks that pass the index eligibility criteria are added to the index, up to a maximum of 300 constituents. If the number of eligible constituents is greater than 300, then all eligible constituents are ranked by float-adjusted market capitalization, with the largest 300 stocks being selected as index constituents.⁴

Multiple Share Classes. One share class for each company in the index is included. If a company in the underlying index has multiple share classes, the priority for inclusion in the S&P New China Sectors Index is 1) Hong Kong-listed shares, 2) U.S.-listed shares, 3) A shares, and 4) Singapore-listed shares.

Constituent Weightings. The index is weighted by modified float-adjusted market capitalization.⁵ At each rebalancing, constituents' weights are capped at 10% of the index.

S&P New China Sectors Ex A-Shares Index

The S&P New China Sectors Ex A-Shares Index is built upon the above methodology while excluding all China A shares. Constituent weights are capped at 10% of the index.

² For companies with multiple share classes, the share classes are combined to measure the company's float-adjusted market capitalization.

³ IPOs with less than three months of trading history must meet the above threshold for the entire time they have been listed.

⁴ Prior to December 19, 2016 the index was not subject to a maximum number of constituents.

⁵ Prior to September 19, 2016, the index employed a capped market capitalization approach with single stocks capped at 10% of the index. The index was built using the same weighting approach as the underlying index since index start date.

S&P China A Venture Enterprises Index

Index Universe. The index universe is defined as all stocks listed on the ChiNext board of the Shenzhen Stock Exchange.

Constituent Selection. Those stocks in the index universe that satisfy the rules for inclusion in the S&P Global BMI are selected and form the index.

Weighting. The index is weighted by float-adjusted market capitalization.

Index Maintenance

Index Calculations

The indices are calculated by means of the divisor methodology used in all S&P Dow Jones Indices' equity indices.

For more information on the index calculation methodology, please refer to the Capitalization Weighted Indices section of S&P Dow Jones Indices' Index Mathematics Methodology (Capped Market Capitalization Indices section for the S&P U.S.-Listed China 50 and S&P Hong Kong-Listed China MidSmallCap Select).

Rebalancing

S&P China 500. The index is rebalanced semi-annually, effective after the close of trading on the third Friday of June and December. The rebalancing reference dates are the last trading day of May and November, respectively.

S&P Access China A, S&P Shanghai-Hong Kong Stock Connect Northbound, S&P Shenzhen-Hong Kong Stock Connect Northbound, and S&P Access China A 50. The indices are rebalanced semi-annually, effective after the close of trading on the third Friday of July and January. The rebalancing reference dates are the last trading day of June and December, respectively.

S&P Hong Kong-Listed China MidSmallCap Select. The index is rebalanced semi-annually, effective at the close of trading on the third Friday of March and September.⁶ The rebalancing reference dates are the last trading day of February and August, respectively.

S&P Access Hong Kong. The index is rebalanced semi-annually, effective after the close of trading on the third Friday of April and October. The rebalancing reference dates are the last trading day of March and September, respectively.

S&P U.S.-Listed China 50. The index is reconstituted annually, effective after the close of trading on the third Friday of September. In addition, index constituent weights are updated quarterly, after the close of trading on the third Friday of March, June, September and December. The rebalancing reference dates are the third Friday of February, May, August and November, respectively.

S&P China A BMI, S&P China A BMI Domestic, S&P China BMI, S&P Total China BMI, S&P Total China BMI Domestic, S&P Total China + Hong Kong BMI, S&P Total China + Hong Kong BMI Domestic, S&P China A Venture Enterprises Index, S&P Total Greater China BMI and S&P Total Greater China BMI Domestic. The indices are reconstituted annually, effective after the close on the third Friday of September. The reconstitution reference date is the last trading day of July.

S&P Hong Kong-Listed China 30. The index is rebalanced quarterly, effective after the close of trading on the third Friday of March, June, September and December. The rebalancing reference dates are the last trading day of February, May, August and November, respectively.

S&P New China Sectors and S&P New China Sectors Ex. A-Shares. The indices are rebalanced semi-annually, effective after the close of the third Friday of June and December. The rebalancing reference date is the close of the last business day of the previous month.

⁶ Prior to September 2009, the semi-annual rebalancings for the S&P Hong Kong-Listed China MidSmallCap Select were the third Friday of June and December.

Additions

S&P Access China A, S&P Shanghai-Hong Kong Stock Connect Northbound, S&P Shenzhen-Hong Kong Stock Connect Northbound, S&P Access China A 50, S&P Access Hong Kong, and S&P China 500. No companies are added to an index between semi-annual rebalancings.

S&P U.S.-Listed China 50. Generally no companies are added to the index between annual reconstitutions. However, initial public offerings (IPOs) are added quarterly effective after the close of trading on the third Friday of March, June and December if the company ranks within the top 10 stocks in the index by total market capitalization. For spin-offs, both the parent and spun-off companies remain in the index until the subsequent index rebalancing, at which point they are re-evaluated for index eligibility.

S&P China A BMI, S&P China A BMI Domestic, S&P China BMI, S&P Total China BMI, S&P Total China BMI Domestic, S&P Total China + Hong Kong BMI, S&P Total China + Hong Kong BMI Domestic, S&P China A Venture Enterprises Index, S&P Total Greater China BMI and S&P Total Greater China BMI Domestic. Generally no companies are added to an index between annual reconstitutions. However, IPOs are added quarterly effective after the close of trading on the third Friday of March, June and December. The criteria for inclusion of an IPO are the same as that used at the annual reconstitution, with the additional requirement that IPOs must have a trading history of at least three months as of the rebalancing reference date in order to be considered for index inclusion. The reference date for IPO additions is five weeks prior to the effective rebalancing date.

To allow for the immediate inclusion or “fast-track” of significantly sized IPOs, the IPO must be among the top five companies within its country/region based on its estimated float-adjusted market capitalization. Companies meeting this criterion are included in an index following an announcement notice.

S&P Hong Kong-Listed China 30. Except for spin-offs, an index addition is generally made only if a vacancy is created by an index deletion. Index additions are made according to market size and liquidity. An initial public offering (IPO) is added to the index only when an appropriate vacancy occurs and is subject to proven liquidity for at least six months. An exception may be made for extraordinarily large offerings where expected trading volume justifies inclusion.

S&P Hong Kong-Listed China MidSmallCap Select. Generally no companies are added to the index between semi-annual rebalancings. However, IPOs are added quarterly effective after the close of trading on the third Friday of June and December if the company ranks within the top 10 stocks in the index by total market capitalization.

S&P New China Sectors and S&P New China Sectors Ex. A-Shares. Additions to the underlying index that become effective at the same time as the indices' rebalancing effective date are eligible for index inclusion, provided they meet all of the index eligibility criteria.

Deletions

Between rebalancings, a company can be deleted from an index due to corporate events such as mergers, acquisitions, takeovers, delistings or bankruptcies.

- Whenever possible, changes in the index's constituents are announced at least two business days prior to their implementation date.
- If an index constituent is suspended by its primary market, it may be removed from the index at the discretion of the Index Committee.
- Whenever practicable, S&P Dow Jones Indices will use the best-available alternate pricing source to determine the value at which the company should be removed from the index.

S&P Access China A, S&P Shanghai-Hong Kong Stock Connect Northbound, S&P Shenzhen-Hong Kong Stock Connect Northbound, S&P Access China A 50, and S&P Access Hong Kong.

Constituents removed from the Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect Programs are removed from the indices after the close of trading on the last business day of the month with five days' notice. On rebalancing months, constituents are removed on the rebalancing date.

S&P New China Sectors and S&P New China Sectors Ex. A-Share. If a constituent is removed from the underlying index, it is removed from the indices simultaneously.

Corporate Actions

For more information, please refer to *S&P Dow Jones Indices' Equity Indices Policies & Practices document*.

Currency, Currency Hedged, and Risk Control Indices

The indices are calculated in the following currencies:

Index	Currencies
S&P Access China A	CNY, HKD and USD
S&P Shanghai-Hong Kong Connect Northbound	CNY, HKD and USD
S&P Shenzhen-Hong Kong Connect Northbound	CNY, HKD and USD
S&P Access China A 50	CNY, HKD and USD
S&P Access Hong Kong	CNY, HKD and USD
S&P U.S.-Listed China 50	CNY and USD
S&P China A BMI	CNY and USD
S&P China A BMI Domestic	CNY and USD
S&P China BMI	AUD, CAD, EUR, GBP, JPY, and USD
S&P Total China BMI	CNY and USD
S&P Total China BMI Domestic	CNY and USD
S&P Total China + Hong Kong BMI	CNY and USD
S&P Total China + Hong Kong BMI Domestic	CNY and USD
S&P Total Greater China BMI	CNY and USD
S&P Total Greater China BMI Domestic	CNY and USD
S&P Hong Kong-Listed China 30	INR and USD
S&P Hong Kong-Listed China MidSmallCap Select	CNY and HKD
S&P China 500	CNY, CAD, EUR, GBP, HKD, SGD, and USD
S&P China 500 Sector Indices	CNY, EUR, HKD, and USD
S&P New China Sectors	HKD and USD
S&P New China Sectors Ex. A-Share	HKD, MYR and USD
S&P China A Venture Enterprises Index	CNY, HKD, and USD

With the exception of the S&P Hong Kong-Listed 30 and S&P Hong Kong-Listed MidSmallCap Select, real-time spot Forex rates, as supplied by Reuters, are used for ongoing index calculation of real-time indices. WM/Reuters foreign exchange rates are taken daily at 4:00 PM London Time and used in the end-of-day calculation of the non-Asian currency indices. These mid-market fixings are calculated by The WM Company based on Reuters data and appear on Reuters pages WMRA. For indices calculated in Asian currencies, index closing values are calculated using spot exchange rates as supplied by Reuters.

S&P Hong Kong-Listed 30 and S&P Hong Kong-Listed MidSmallCap Select. Real-time spot Forex rates, as supplied by Reuters, are used for ongoing index calculation. The end-of-day value of the index is calculated using the real-time spot exchange rate provided by Reuters at the time the index is closed.

Additional currency, currency hedged, and risk control versions of the indices may be available. For a list of available currency, currency hedged, and risk control indices, please contact Client Services at index_services@spglobal.com.

For more information on currency, currency hedged, and risk control indices, please refer to *S&P Dow Jones Indices' Index Mathematics Methodology*.

Investable Weight Factor (IWF)

All issues in the S&P China Indices are assigned a float factor, called an Investable Weight Factor (IWF). The IWF ranges between 0 and 1 and is an adjustment factor that accounts for the publicly available shares of a company. The company's adjusted market capitalization determines an equity issue's relative weight in the index.

Please refer to the S&P Dow Jones Indices' Float Adjustment Methodology document for details.

Shares. For more information on shares outstanding changes, please refer to *S&P Dow Jones Indices' Equity Indices Policies & Practices* document.

Other Adjustments

In cases where there is no achievable market price for a stock being deleted, it may be removed at a zero or minimal price at the Index Committee's discretion, in recognition of the constraints faced by investors in trading bankrupt or suspended stocks.

Base Dates and History Availability

Index history availability, base dates and base values are shown in the table below.

Index	Launch Date	First Value Date	Base Date	Base Value
S&P Access China A	12/19/2016	12/31/2010	12/31/2010	1000

S&P China A Venture Enterprises Index	08/03/2017	12/18/2009	12/18/2009	100

Index Data

Calculation Return Types

S&P Dow Jones Indices calculates multiple return types which vary based on the treatment of regular cash dividends. The classification of regular cash dividends is determined by S&P Dow Jones Indices.

- Price Return (PR) versions are calculated without adjustments for regular cash dividends.
- Gross Total Return (TR) versions reinvest regular cash dividends at the close on the ex-date without consideration for withholding taxes.
- Net Total Return (NTR) versions, if available, reinvest regular cash dividends at the close on the ex-date after the deduction of applicable withholding taxes.

In the event there are no regular cash dividends on the ex-date, the daily performance of all three indices will be identical.

For a complete list of indices available, please refer to the daily index levels file (“`.SDL`”).

For more information on the classification of regular versus special cash dividends as well as the tax rates used in the calculation of net return, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

For more information on the calculation of return types, please refer to S&P Dow Jones Indices' Index Mathematics Methodology.

Index Governance

Index Committee

The indices are maintained by an Index Committee. The Index Committee meets regularly. All committee members are full-time professional members of S&P Dow Jones Indices' staff. At each meeting, the Index Committee may review pending corporate actions that may affect index constituents, statistics comparing the composition of the indices to the market, companies that are being considered as candidates for addition to an index, and any significant market events. In addition, the Index Committee may revise index policy covering rules for selecting companies, treatment of dividends, share counts or other matters.

S&P Dow Jones Indices considers information about changes to its indices and related matters to be potentially market moving and material. Therefore, all Index Committee discussions are confidential.

S&P Dow Jones Indices' Index Committees reserve the right to make exceptions when applying the methodology if the need arises. In any scenario where the treatment differs from the general rules stated in this document or supplemental documents, clients will receive sufficient notice, whenever possible.

In addition to the daily governance of indices and maintenance of index methodologies, at least once within any 12-month period, the Index Committee reviews the methodology to ensure the indices continue to achieve the stated objectives, and that the data and methodology remain effective. In certain instances, S&P Dow Jones Indices may publish a consultation inviting comments from external parties.

For information on Quality Assurance and Internal Reviews of Methodology, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Index Policy

Announcements

All index constituents are evaluated daily for data needed to calculate index levels and returns. All events affecting the daily index calculation are typically announced in advance via the Index Corporate Events report (SDE), delivered daily via ftp to all clients. Any unusual treatment of a corporate action or short notice of an event may be communicated via email to clients.

For more information, please refer to the Announcements section of S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Pro-forma Files

In addition to the corporate events file (.SDE), S&P Dow Jones Indices provides constituent pro-forma files each time the indices rebalance. The pro-forma file is typically provided daily in advance of the rebalancing date and contains all constituents and their corresponding weights and index shares effective for the upcoming rebalancing. Since index shares are assigned based on reference prices prior to the rebalancing, the actual weight of each stock at the rebalancing differs from these weights due to market movements.

For non-float-adjusted market capitalization indices, constituents' index shares are calculated using closing prices on the Wednesday prior to the second Friday of the rebalancing month as the reference price. Index share amounts are calculated and assigned to each stock to arrive at the weights determined on the reference date. Since index shares are assigned based on the reference prices, the actual weight of each stock at the rebalancing differs from these weights due to market movements.

Please visit www.spdji.com for a complete schedule of rebalancing timelines and pro-forma delivery times.

Holiday Schedule

The indices are calculated daily, throughout the calendar year. The only days an index is not calculated are on days when all exchanges where an index's constituents are listed are officially closed.

A complete holiday schedule for the year is available at www.spdji.com.

Rebalancing

The Index Committee may change the date of a given rebalancing for reasons including market holidays occurring on or around the scheduled rebalancing date. Any such change will be announced with proper advance notice where possible.

Unexpected Exchange Closures

For information on Unexpected Exchange Closures, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Recalculation Policy

For information on the recalculation policy, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Real-Time Calculation

Real-time, intra-day, index calculations are executed for certain indices, whenever any of their primary exchanges are open. Real-time indices are not restated.

For information on Calculations and Pricing Disruptions, Expert Judgment and Data Hierarchy, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Contact Information

For questions regarding an index, please contact: index_services@spglobal.com.

Index Dissemination

Index levels are available through S&P Dow Jones Indices' Web site at www.spdji.com, major quote vendors, numerous investment-oriented Web sites, and various print and electronic media.

Tickers

The table below lists headline indices covered by this document. All currency, currency hedged, risk control, and return type versions of the below indices that may exist are also covered by this document. Please contact index_services@spglobal.com for a complete list of indices covered by this document.

Appendix I

Chinese Share Classes

A Shares. These are shares of companies incorporated in mainland China and traded on the Shanghai or Shenzhen Stock Exchanges in Chinese renminbi.

B Shares. These are shares of Chinese companies that trade in U.S. dollars on the Shanghai Stock Exchange and in Hong Kong dollars on the Shenzhen Stock Exchange.

H Shares. These are shares of companies that are incorporated in mainland China, but trade on the Hong Kong Stock Exchange. They are traded in Hong Kong dollars and are accessible to non-residents of China.

Red Chips. These are shares of Chinese companies that are incorporated outside of mainland China and listed on the Hong Kong Stock Exchange. Red Chips, which are controlled by mainland Chinese entities, are traded in Hong Kong dollars and are available to non-residents of China.

P Chips. These are shares of non-state owned Chinese companies that are incorporated outside of the mainland in domiciles of convenience such as the Cayman Islands, Bermuda, etc. and listed on the Hong Kong Stock Exchange.

U.S.-Listed Chinese Companies. U.S.-listed Chinese companies are defined as companies that primarily operate in mainland China but whose primary listings are on a U.S. exchange.

Appendix II

Domiciles of Convenience

Domiciles of convenience include the following:

- Bermuda
- Channel Islands (as in British Channel)
- Gibraltar
- Islands in the Caribbean: Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, British Virgin Islands, Cayman Islands, Curacao, Dominica, the Dominican Republic, Grenada, Haiti, Jamaica, Montserrat, Navassa Island, Puerto Rico, St. Barthlemy, St. Kitts and Nevis, St. Lucia, St. Martin, St. Vincent and Grenadines, Trinidad and Tobago, Turks and Caicos, the Virgin Islands
- Isle of Man
- Luxembourg
- Liberia
- Panama

Appendix III

Methodology Changes

Methodology changes since January 1, 2015 are as follows:

Change	Effective Date (After Close)	Methodology	
		Previous	Updated
S&P Hong Kong Listed China MidSmallCap Select Liquidity Requirement	09/21/2018	Stocks must have a three-month median daily value traded of at least HKD 20 million (HKD 15 million for current index constituents).	Stocks must meet a relative median daily value traded inclusion threshold in order to be eligible for index inclusion. The inclusion threshold is determined by ranking the eligible universe of stocks by descending 12-month median daily value traded ("12M MDVT"). Any stock with a 12M MDVT value at or above the lowest 12M MDVT value from the top 70% of the float-adjusted market capitalization of the eligible universe is eligible for index inclusion, with a 5% buffer applied for current index constituents.
S&P China A BMI, S&P Total China BMI, S&P Total China + Hong Kong BMI, and S&P Total Greater China BMI Name Change	07/30/2018	The names were: ⁷ <ul style="list-style-type: none"> • S&P China A BMI • S&P Total China BMI • S&P Total China + Hong Kong BMI • S&P Total Greater China BMI 	The names are: <ul style="list-style-type: none"> • S&P China A BMI Domestic • S&P Total China BMI Domestic • S&P Total China + Hong Kong BMI Domestic • S&P Total Greater China BMI Domestic
S&P Shenzhen-Hong Kong Connect Northbound as sub-set of S&P Access China A Index Universe	07/20/2018	The index universe is defined as all stocks in the S&P China A BMI and all stocks listed on the ChiNext board of the Shenzhen Stock Exchange.	The index universe is defined as all stocks in the S&P China A BMI and S&P China A Venture Enterprises Index.
S&P China BMI Indices and S&P China A Venture Enterprise Index Trading History Requirement for Initial Public Offering (IPOs):	06/15/2018	--	IPOs must have a trading history of at least three months as of the rebalancing reference date.
S&P New China Sectors Index: Index Universe	12/15/2017	The index universe is defined as all constituents of the S&P Total China + Hong Kong BMI.	The index universe is defined as all constituents of the S&P Total China + Hong Kong BMI that are incorporated in China, Hong Kong, Singapore, and domiciles of convenience (see <i>Appendix I</i>).
S&P U.S.-Listed China 50: Rebalancing Reference Date	09/15/2017	The rebalancing reference date is the last business day of the month prior to rebalancing.	The rebalancing reference date is the third Friday of the month prior to rebalancing.

⁷ A series of FOL-Adjusted indices launched that use the same names as these indices, which required the name change by adding "Domestic" to the names of these indices.

Change	Effective Date (After Close)	Methodology	
		Previous	Updated
S&P Shenzhen-Hong Kong Connect Northbound: Index Universe	07/21/2017	The index universe is defined as all stocks in the S&P China A BMI.	The index universe is defined as all stocks in the S&P China A BMI and all stocks listed on the ChiNext board of the Shenzhen Stock Exchange.
S&P China 500: Index Universe	06/16/2017	The index universe is defined as all constituents of the S&P Total China BMI that meet the following criteria as of the rebalancing reference date: <ul style="list-style-type: none"> • Float-adjusted market capitalization must be at least US\$ 300 million (US\$ 250 million for existing constituents). • Six-month median daily value traded must be at least US\$ 1 million (US\$ 0.8 million for existing constituents). • Annual trade turnover must be at least 60% (50% for existing constituents). Annual trade turnover is defined as the ratio of annual dollar value traded to float-adjusted market capitalization. 	The index universe is defined as all constituents of the S&P Total China BMI that meet the following criteria as of the rebalancing reference date: <ul style="list-style-type: none"> • Float-adjusted market capitalization must be at least US\$ 300 million (US\$ 250 million for existing constituents). • Six-month median daily value traded must be at least US\$ 1 million (US\$ 0.8 million for existing constituents).
S&P Access China A 50: Index Universe	12/16/2016	The index universe is defined as all stocks in the S&P Access China A (now known as the S&P Shanghai-Hong Kong Connect Northbound).	The index universe is defined as all stocks in the S&P Access China A.
S&P Access China A: Index Name	12/16/2016	S&P Access China A.	S&P Shanghai-Hong Kong Connect Northbound.
S&P Access China A and S&P Access China A 50: Rebalancing Schedule	11/30/2016	The indices are rebalanced semi-annually, effective after the close of trading on the third Friday of June and December. The rebalancing reference dates are the last trading day of May and November, respectively.	The indices are rebalanced semi-annually, effective after the close of trading on the third Friday of July and January. The rebalancing reference dates are the last trading day of June and December, respectively.
S&P Access Hong Kong: Rebalancing Schedule	11/30/2016	The index is rebalanced semi-annually, effective after the close of trading on the third Friday of March and September. The rebalancing reference dates are the last trading day of February and August, respectively.	The indices are rebalanced semi-annually, effective after the close of trading on the third Friday of April and October. The rebalancing reference dates are the last trading day of March and September, respectively.

STANDARD & POOR'S, S&P, SPDR, S&P 500, S&P EUROPE 350, S&P 100, S&P 1000, S&P COMPOSITE 1500, S&P MIDCAP 400, S&P SMALLCAP 600, GIVI, GLOBAL TITANS, S&P RISK CONTROL INDICES, S&P GLOBAL THEMATIC INDICES, S&P TARGET DATE INDICES, S&P TARGET RISK INDICES, DIVIDEND ARISTOCRATS, STARS, GICS, HOUSINGVIEWS, INDEX ALERT, INDEXOLOGY, MARKET ATTRIBUTES, PRACTICE ESSENTIALS, S&P HEALTHCARE MONITOR, SPICE, and SPIVA are registered trademarks of Standard & Poor's Financial Services LLC, a division of S&P Global ("S&P"). DOW JONES, DJ, DJIA and DOW JONES INDUSTRIAL AVERAGE are registered trademarks of Dow Jones Trademark Holdings LLC ("Dow Jones"). These trademarks together with others have been licensed to S&P Dow Jones Indices LLC. Redistribution, reproduction and/or photocopying in whole or in part are prohibited without written permission. This document does not constitute an offer of services in jurisdictions where S&P Dow Jones Indices LLC, Dow Jones, S&P or their respective affiliates (collectively "S&P Dow Jones Indices") do not have the necessary licenses. All information provided by S&P Dow Jones Indices is impersonal and not tailored to the needs of any person, entity or group of persons. S&P Dow Jones Indices receives compensation in connection with licensing its indices to third parties. Past performance of an index is not a guarantee of future results.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. S&P Dow Jones Indices does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. S&P Dow Jones Indices makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor, and S&P Dow Jones Indices makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other investment product or vehicle. S&P Dow Jones Indices LLC is not a tax advisor. A tax advisor should be consulted to evaluate the impact of any tax-exempt securities on portfolios and the tax consequences of making any particular investment decision. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice.

These materials have been prepared solely for informational purposes based upon information generally available to the public and from sources believed to be reliable. No content contained in these materials (including index data, ratings, credit-related analyses and data, research, valuations, model, software or other application or output therefrom) or any part thereof ("Content") may be modified, reverse-engineered, reproduced or distributed in any form or by any means, or stored in a database or retrieval system, without the prior written permission of S&P Dow Jones Indices. The Content shall not be used for any unlawful or unauthorized purposes. S&P Dow Jones Indices and its third-party data providers and licensors (collectively "S&P Dow Jones Indices Parties") do not guarantee the accuracy, completeness, timeliness or availability of the Content. S&P Dow Jones Indices Parties are not responsible for any errors or omissions, regardless of the cause, for the results obtained from the use of the Content. THE CONTENT IS PROVIDED ON AN "AS IS" BASIS. S&P DOW JONES INDICES PARTIES DISCLAIM ANY AND ALL EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, FREEDOM FROM BUGS, SOFTWARE ERRORS OR DEFECTS, THAT THE CONTENT'S FUNCTIONING WILL BE UNINTERRUPTED OR THAT THE CONTENT WILL OPERATE WITH ANY

SOFTWARE OR HARDWARE CONFIGURATION. In no event shall S&P Dow Jones Indices Parties be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs) in connection with any use of the Content even if advised of the possibility of such damages.

S&P Global keeps certain activities of its various divisions and business units separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain divisions and business units of S&P Global may have information that is not available to other business units. S&P Global has established policies and procedures to maintain the confidentiality of certain non-public information received in connection with each analytical process.

In addition, S&P Dow Jones Indices provides a wide range of services to, or relating to, many organizations, including issuers of securities, investment advisers, broker-dealers, investment banks, other financial institutions and financial intermediaries, and accordingly may receive fees or other economic benefits from those organizations, including organizations whose securities or services they may recommend, rate, include in model portfolios, evaluate or otherwise address.

The Global Industry Classification Standard (GICS®) was developed by and is the exclusive property and a trademark of S&P and MSCI. Neither MSCI, S&P nor any other party involved in making or compiling any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.
